

INTRODUCCION

The delegates began to make their opening speeches where each delegate speaks and proposes seeking financial solutions and avoiding the lack of oil or “not having economic disasters like the one in 2008” (Opening speech phrase from the Republic of Congo) . What they are looking for is not to suffer another economic crisis like the crisis of '08 or the great depression of the 1930s.

DESARROLLO DEL MODELO

They continue with informal debate and Italy seeks to control the resources to control the high demand and the low supply, so it wants to regulate other delegations that provide a lot of trade and thus be able to equalize supply and demand. The delegation of the United Kingdom in collaboration with the delegation of Switzerland, Russia and the United States, to provide scholarships with follow-up for students in the delegations of Colombia and Bolivia.

The delegations of Switzerland and China seek to make a proposal to stabilize the global economy against the use of cryptocurrency, since China has its own digital currency like the United States, so according to this, both delegations seek to help those delegations that need help in the form of a virtual currency. But the Italian delegation says that to do that there must be advice and regulatory margin for these crypto currencies, since the delegation says that it is not safe to use crypto currencies as a way to financially help other delegations.

A new crisis was created where with bitcoin the rise in oil, nickel, among others. Which different delegations, such as Switzerland, Italy, among others, looked for 3 types of solutions in which they are cryptocurrency, oil among others.

CIERRE

In the Wall Street commission, the countries focus on the problems of a society of 2030, with problems of oil, bitcoin, among others, so all the delegations focused on solving them. And then a problem was generated that must be current and from there the delegates had about half an hour of lobbying to get organizations to rescue this problem.
