

WORLD HEALTH ORGANIZATION

INTRODUCTION

The World Health Organization was founded on the year 1948 to prevent world-wide healthcare related crisis, ensuring the first-generation rights such as life and health. On this committee, the delegations are discussing about the Gaza strip and how it became a public health problem world-wide and look for possible solutions for it. Caring about the human dignity and Human Rights application.

DEVELOPMENT OF THE MODEL

The committee began with a moderated caucus of 30 minutes where the delegations had the opportunity to talk about the position they had towards the topic A: "Armed conflict as a public health problem; Gaza strip". The delegation of "Peoples Republic of China" talked about the history of the conflict and made the other delegations know that the Gaza strip conflict is not a recent topic; started when Israel was recognized as an independent state on the year 1948 and that has taken the lives of thousands of citizens living on the geographical area between Israel and Palestine. Some topics such as the armed group Hamas and how they are involved on the situation, the mental health of both people and soldiers making part of the conflict and the destruction of several public healthcare institutions in both Israel and Palestine Regions. During the development of the model, the delegation of Israel stated "If Palestine attacks, we will attack", opening the chance of prolongation of the conflict. The delegates hope that the delegates can reach for a solution regarding the debated topic.

CIERRE

Until now, the delegation of Nigeria opened the solution of rebuild hospitals and clinics with the help and support of the WHO; In the other hand, the delegation of India said "If delegations give resources, the resources will not work because the conflict will continue", this means that the only given solution has not been discussed in a proper way among the delegations present on the room because there are still misconceptions and several discontents about the proposal.
